

Materials: Teachers Resource: Part 1 (Focus on science)

This text is part of a GCSE science series written specifically for students who will be entered at foundation level in chemistry. The series consists of six students books, accompanied by teachers resources. The books contain a range of questions to consolidate students learning, and self-contained magazine-style spreads on areas of popular scientific interest. Activities and exercises to help support learning and examination practice are also included. This teachers resource book contains helpful notes and answers to questions for each spread in the students book, diagrams which can be reproduced as hand-outs for students or as OHP transparencies, and photocopyable work, data and helpsheets for homework and extension tasks.

National Science Resources Center of the National Academy of Sciences and Materials: Available locally, from commercial suppliers, or in kits from Lets Get Growing.
