

Whoosh!: A Watery World of Wonderful Creatures

A wonderful, whimsical exploration of various animals in the water and the ways in which children can, and do, mimic them, Whoosh! gets young readers thinking and moving. Each spread features an animal in a watery scene opposite a child mimicking the animal's activity in some way. From splashing like a dolphin to fishing like a heron, from snoozing like an alligator to hiding like a clownfish, the echoing images bring to life the real ways that animals behave and reveal how there's a little bit of animal in all of us. The book closes with a Guess What? section that provides brief and quirky facts about the animals featured throughout. A rebus at the back encourages children to read on their own and discover other ways to get up and move, by scuttling like a crab or waddling like a penguin. With Whoosh! readers will splash through the bright, engaging illustrations into a water-filled world of play and learning.
