threes to look carefully at a picture for evidence of forces in action. Mark all the pushes and pulls with arrows that show the direction of force and prepare to discuss and share what they believe. Read aloud pages 46 of Exploring Forces and Movement to introduce the concept of a force. In this phase students will work in small groups to investigate how forces speed up, slow down, and change (Is it straight, curved, zigzagged?) Forces are all around us and affect everything we do, with that in mind we've put together a collection of ideas for learning about forces with something for everyone from preschoolers to grown ups. A force is a push or a pull. Forces can make objects move or stop, speed them up or slow them down.
